HIGH EXPERTISE IN COATING

The Folex Group specialises in the finishing and coating of films and specialities and has production companies based in Switzerland and Germany that offer high-quality products and tailor made services for a wide variety of markets.

Folex dynamically adapts its portfolio to changing customer needs and technical developments. Based on its core competence, coating, Folex constantly works on optimising existing products to develop new potential applications for different technologies. Today Folex offers solutions for many sectors, from the printing industry or digital and large-format printing, the office and home sector, all the way to primary products for the electronics industry. In addition to which, Folex has also developed extensive skills in membrane separation technology.

As a family-owned company with a long-standing tradition, we feel committed to a clearly defined set of values based on integrity, dependability, quality, a love of innovation, and awareness of our responsibilities. As our customer, you can also benefit directly from this competence and our innovation. For instance, we can offer you consulting services during the development phase, or develop new solutions on your behalf.

PICTOGRAM OVERVIEW

- Suitable for Ink Jet printer
- Suitable for colour laser printer
- Suitable for mono laser printer
- Suitable for colour copier
- Suitable for mono copier
- Instant dry coating
- Fast dry coating
- Also suitable for machines with high fixing temperature
- Heat press activation
- Electric iron activation
- Removable stripe for sensor detection
- Offers improved water resistance
- Paperbacked short side
- Paperbacked long side
- Removable stripe short side
- Removable stripe long side
PROFESSIONAL PHOTOGRAPHIC PAPER
Super weight true photo base paper with a microporous coating which absorbs inks instantly into the surface and produces stunning photographic results with Epson, Canon and HP photo printers. Papers can accept high levels of dye or pigmented ink which dry instantly, exhibiting superior flatness and colour brilliance. Professional paper is the ultimate for photographic images from your digital camera, photo CD etc. Available in gloss or satin.

- **Fotojet Pro Gloss**

INSTANT DRY PHOTO PAPER
Gloss paper with a coating which absorbs inks instantly into the surface and produces good photo results. Papers can accept medium-high levels of ink with near instant drying with good flatness and colour brilliance. Glossy paper is a lower cost alternative to our Pro grade for photo images from your digital camera, photo CD etc.

FINE ART PAPER
Universal archival artist papers. Fine Art Paper Contour is made of 100% cellulose, it has a subtle texture and is ideal for producing high quality fine art reproductions. Fine Art Paper Photo is made of 75% linters (cotton) and 25% cellulose it has a whiter, smoother surface and is perfect for digital photographic output. All papers offer excellent archival properties along with a top coating that ensures stunningly brilliant colours with high density solid blacks.

CANVAS CLOTH MATT EXTRA-WHITE
Canvas poly/cotton blend fabric cloth with a high white, matt front surface and natural back for photographers to create that modern, contemporary photographic canvas look. It is compatible with pigment or dye based inks. It offers superior water and wet smear resistance as well as good light stability when used in combination with pigmented inks. Images dry super fast due to a highly porous coating ensuring production speeds are optimised. This canvas offers reliability and consistency along with superb image quality and colour contrast reproduction.

- Folajet Canvas P-W
  Matt extra-white 320 gsm 50 A4 21160.320.44100

ADHESIVE FILM
Special coated film with a permanent adhesive backing that sticks to most clean surfaces. Available in clear transparent and gloss white finish. It can be used to create your own unique indoor stickers, labels, signage, decals, mock-ups etc.

- Sticky Jet CL
  Clear 0.050 mm 50 A4 2939C.050.44100
  0.050 mm 10 A4 2939C.050.51000

  0.050 mm 10 A4 2939W.050.51000

SELF-ADHERING FILM
Clear self-adhering indoor stickers for signage, labels, displays etc. The film does not have a sticky adhesive but clings to smooth clean surfaces like glass, plexi or polished metal. Due to the special backing it can be repositioned without leaving any adhesive residue.

- Cling Jet
  Clear 0.310 mm 50 A4 2939X.310.44100
TRANSFER PAPER FOR WHITE AND LIGHT FABRIC
Special coated transfer paper to print your own graphic design or text onto white or light coloured T-shirts, caps, or any other cotton based fabric. Simply print your image in mirror mode, apply face down onto the fabric and then heat transfer using either a household iron or a dedicated heat press.

- Transfer Jet ST
  - 50 A4 04100.000.44100
  - 10 A4 04100.000.51000

TRANSFER PAPER FOR DARK AND WHITE FABRIC
Special coated transfer paper to print your own graphic design or text onto black, coloured or white T-shirts, caps, or any other cotton based fabric. Simply print your image, apply face up onto the fabric and then heat transfer using either a household iron or a dedicated heat press.

- Transfer Jet Black
  - 50 A4 04250.000.44100
  - 5 A4 04250.000.50400

TRANSFER PAPER GLOWING FOR WHITE AND DARK FABRIC
Special coated transfer paper to print your own graphic design or text that glow in the dark onto black, coloured or white coloured T-shirts, caps, or any other cotton based fabric. Simply print your image, apply face up onto the fabric and then heat transfer using either a household iron or a dedicated heat press.

- Transfer Jet Phosphor-Glow
  - 50 A4 04300.000.44100
  - 3 A4 04300.000.50300
BACKLIT DISPLAY FILM
Matt translucent film suitable for backlit displays. Applications such as signage, lampshades and displays that use rear illuminated lighting to add impact. The special coating absorbs even large amounts of ink without an excessive drying time. By printing images in mirror reverse the image can be viewed through the now protective film base.

- **Backlit Jet**
  - Matt translucent

GLOSS WHITE FILM
Glossy white film provides brilliant, vibrant images onto tear free PET polyester which does not require lamination. The glossy surface provides a tough, wipe clean finish. The imaged film has outstanding toner bonding and good water resistance. Ideal for long life, archival applications and as a universal colour toner film. It has the same printable coating on both sides and is available in a variety of different thicknesses. To produce durable manuals, outdoor signs, point of sale, point of purchase, charts, maps, signage, menu cards etc.
